

Crime Fighter BEAST Evidence Management System

About Porter Lee Corporation

Porter Lee Corporation has been in business for more than 10 years providing forensic LIMS and evidence handling software and services. We serve only the forensic and law enforcement communities. Our product was born in the crime lab and police property room. From the beginning, the entire product line has been designed to facilitate the collection and preservation of forensic evidence, provide an unbreakable chain-of-custody record, and enhance the day-to-day efficiency of the agencies in which we operate.

Unmatched Experience & Credentials

Our evidence tracking package is in use with more than 350 state, county and municipal police agencies across America and internationally. Porter Lee Corporation is ISO certified to the ISO9001:2000 standard.

Complimentary Products:

- Crime Fighter BEAST Laboratory Information Management System (LIMS)
- COBIS Ballistics Identification System Database
- Quartermaster Property Management System
- MUGS Digital Mug shot System
- VINCHECK Portable License and Registration Verification Database

Crime Fighter BEAST

World-class **features** and the finest **support** in the industry have made the Crime Fighter BEAST the leading police evidence management system in the United States. The Crime Fighter BEAST is a mature, full-featured evidence handling solution with more than 10 years of evolutionary enhancements behind it. While other vendors are still "figuring it out" as they go along, we have already encountered and overcome the "unforeseen" difficulties inherent in managing evidence and property. With more than 300 systems installed in North America, there simply is no other choice when you require a no surprises implementation, seamless operation and experienced, knowledgeable support.

Major Features

Some of the major features of the Crime Fighter BEAST are listed below:

- Scalable from a single workstation to 100's of users across multiple sites.
- Chain of custody tracking from collection through disposition.
- Easy interface/compatibility with industry-standard RMS systems.
- Ability to incorporate your existing system's barcodes.
- Available mobile crime scene collection interface.
- Comprehensive Ad-hoc reporting.
- PDF417 barcodes for easy case transfer and submission to forensic labs.
- Fully configurable to match your existing workflow.
- Letter-writing using Word templates.
- Web interface for remote users and for pre-logging cases to forensic labs.
- Ability to incorporate signatures or other biometric authentication.
- Fully integrated pull requests and pull-lists.
- Automated reminders for virtually any requirement.
- Complete inventory management including remote inventory using handheld computers.

Evidence Management

- Field-Level Audit Logging
- Enhanced Property Disposition
- Crime Laboratory Integration
- Integral Image Vault
- RMS Interface Expertise
- Available Web-Based Interface

Active Bar Codes

The Crime Fighter BEAST is always ready for your barcode data. There is no need to enter any specific mode or system screen to scan barcodes. Simply scan an item bar code to immediately access its item and case data.

Audit Logging

The need for a robust accounting of access to the system, changes to case and item information and other pertinent access is met using the Crime Fighter BEAST Audit Logging feature. Virtually all modifications to case data is logged in an unalterable form in the database. The logged information is easily searched and printed.

Property Disposition

Statistics on process efficiency are maintained at all steps of the managed workflow. This detailed compilation of data allows for ad hoc reports regarding turnaround time at each stage of the analysis. This information is very beneficial in identifying bottlenecks in your process or where to direct needed resources.

Crime Laboratory Integration

Submitting evidence for laboratory analysis is easy and foolproof; especially when working with laboratories who utilize Porter Lee Corporation's Laboratory Information Management System (LIMS). Working together, your evidence system and the LIMS provide a complete approach to evidence tracking and reporting from the time of collection, through forensic analysis, return, and final disposition. For police agencies with their own internal labs, the BEAST can be used to enhance workflow by managing lab assignments, recording results and providing templates for writing analysis reports.

Integral Image Vault

Images may be attached to case files and stored in the system. Images may be associated with items, people or the case in general.

RMS Interface Expertise

One of the most common complaints we hear from property officers is that they must use an RMS system that was never designed to handle police evidence/property. At Porter Lee Corporation we are highly experienced with integrating the Crime Fighter BEAST with existing Records Management Systems (RMS). You will have an integrated system that truly meets your individual needs.

Web-Based System Interface

The Crime Fighter BEAST now offers a web-based alternative to our client-server product (see below). This system allows remote users to create cases, inquire after existing cases, run reports and create laboratory submissions.
