

# TC21 Modules

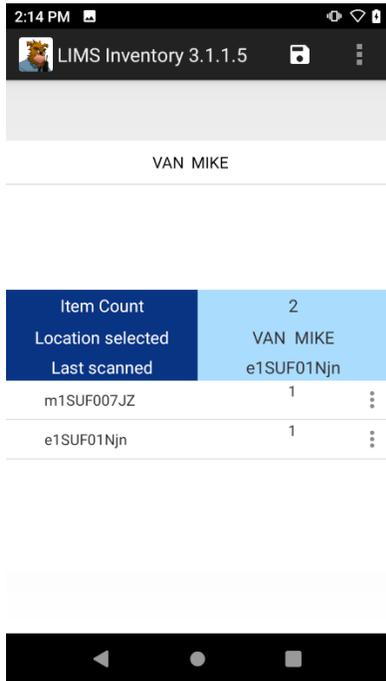

TC21 functionality includes the following:

- BEAST .NET Inventory \*
- BEAST .NET Transfer\*
- LAM .NET Inventory
- LAM .NET Transfer

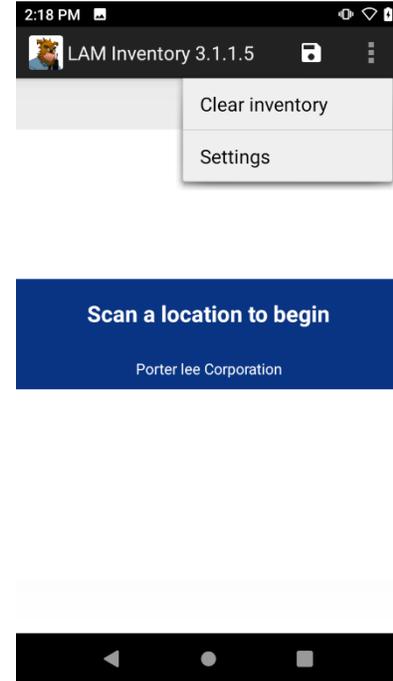

\*A separate program for processing the Android files is provided for EMS/LIMS client-server customers.

## Inventory on TC21:

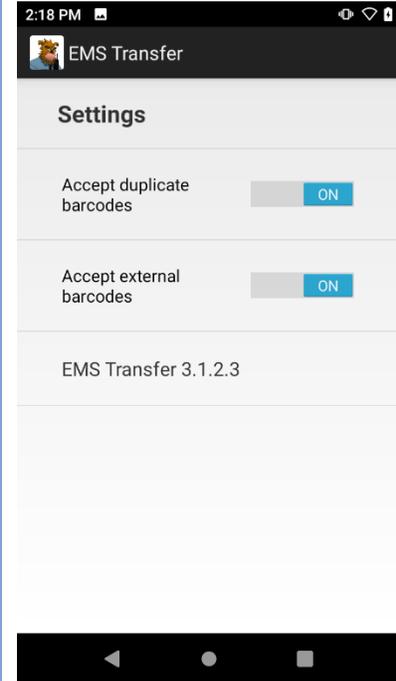

Scan items and containers in a given location, see a count of items, and see barcode data

Access settings and clear any previous inventories

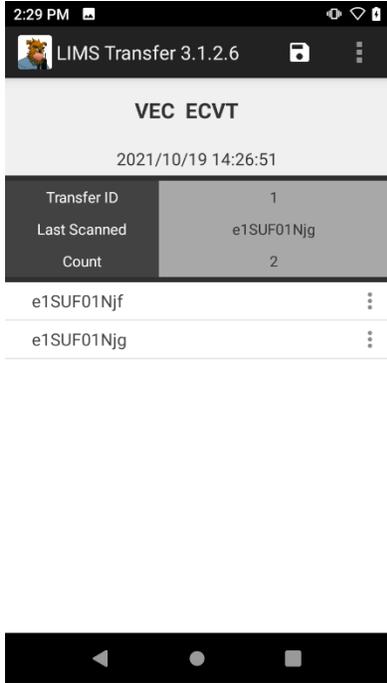

Adjust what barcodes can be scanned in using settings

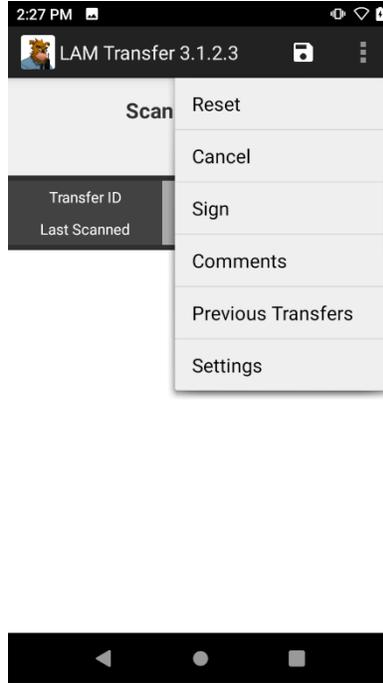

## Transfer on TC21:

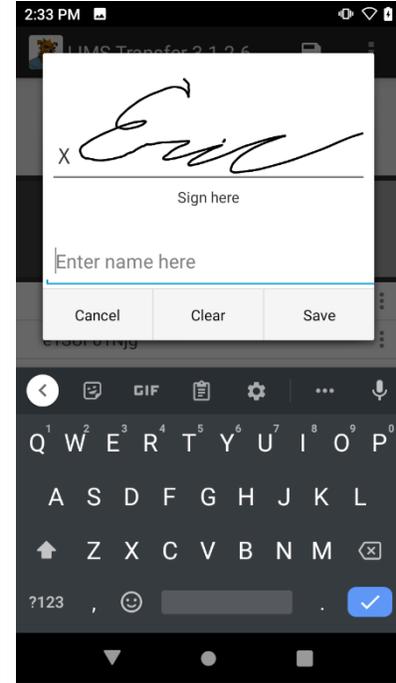

Scan items and containers being transferred to the new location, keep count of transferred items

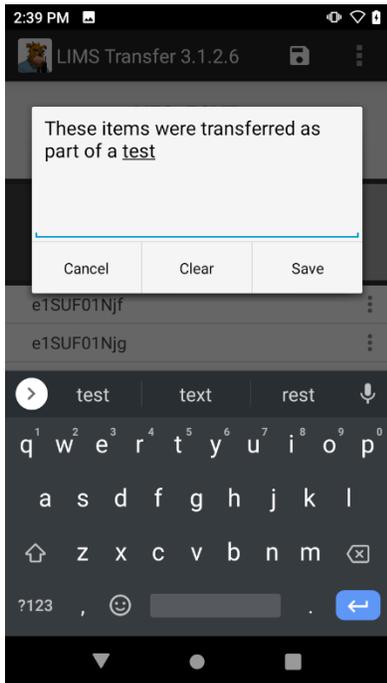

Use the menu in the top right to access more functions of the app and reset/cancel transfers.

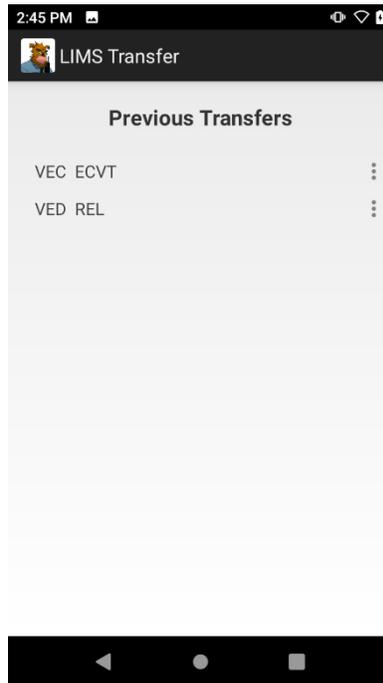

Sign off and type in your name to have custody records with more detailed information.

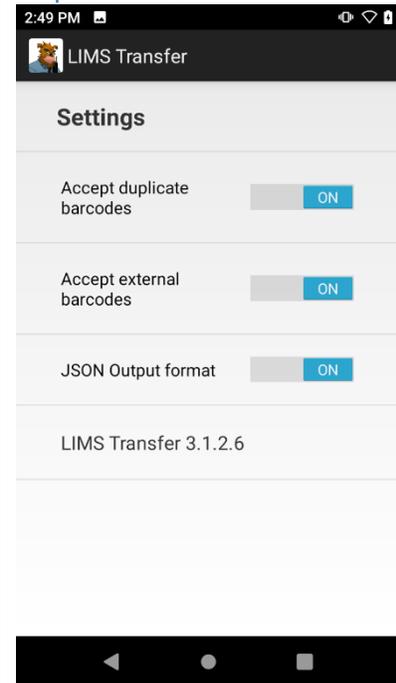

Write comments regarding the transfer to put in extra details.

Access a list of locations that are part of the saved transfer file on the TC21.

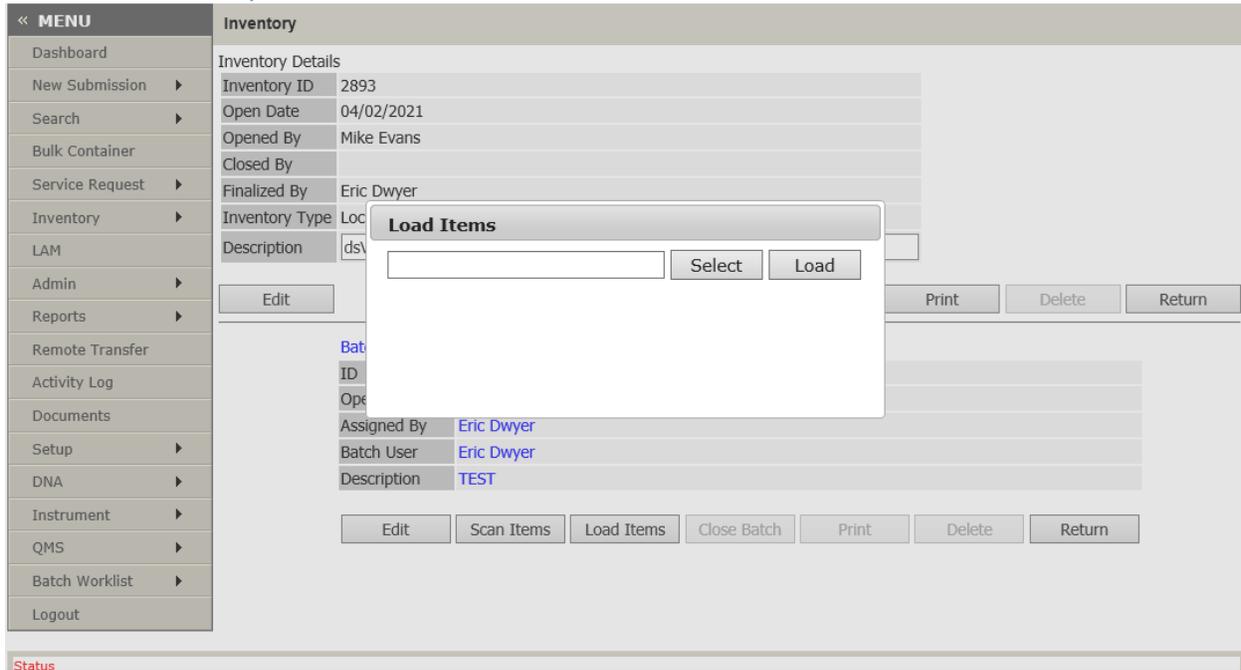

Adjust which barcodes can be scanned and toggle the .json output format.

## Inventory:

Load entire inventory scans from the TC21 handheld device.

Print inventory exception reports for full inventories or individual batches.

### Crime Laboratories

### Inventory Summary Report
